I have experience leading a team of 5 to achieve organization's strategic goals. With my experience at Shopee during their scale up period, I believe my insights would be useful to CoinGecko.

Work Experience

Shopee Pte Ltd *Dec 20 – present*

System QA Engineer (Full-time)

Responsible for ensuring quality delivery of features throughout the development lifecycle.

- Achieved a low bug count of 2.38% by methodologically designing and executing test cases (manual, API, regression).
- Eliminated forgotten bug tickets and reduced meeting time by 16.67%, by implementing a reminder bot to keep stakeholders updated on outstanding bugs.
- Improve testing speed by 30%, by implementing utilities for test data creation.
- Reduced testing time by up to 90% by implementing automated regression cases.
- Provided mentorship to 1 System and 1 Automation QA (fresh grads and interns).

Fresh Cars Pte Ltd *Jul 20 – Dec 20*

Software Engineer + Technical Product Manager (Part-time)

Responsible for various technology implementations related to business needs.

- Gathered business requirements from Sales Team, Accountants and Director to improve operations workflow.
  - Adopted an Agile Development Cycle (weekly sprints).
- Implemented various Microsoft Excel VBA functions to speed up operations workflow.
- Performed weekly User Acceptance Test to refine requirements.

Katalyst Pte Ltd *May 18 – Jul 18*

Frontend Developer (Internship)

Responsible for overhauling the frontend of Katalyst Decentralized Exchange and Katalyst Wallet.

- Created low-fidelity and high-fidelity Wireframes using Adobe XD.
- Developed a web application (frontend) based on high fidelity Wireframes.

Ministry of Defence Singapore *Sep 12 – Nov 16*

Senior Research Analyst (Full-time)

Responsible for analysis, research and reporting. In the later parts of my career, I have picked up programming knowledge and started implementing systems to automate parts of the workflow.

- Led a team of 5 to develop a Geospatial Information Systems Dashboard.
- Led user interviews with stakeholders to identify key user pain points.
- Design and developed process automation system to improve weekly internal reporting and daily operations, which helps achieve organization strategic plans.
  - Developed a prototype that generates reports from Microsoft Excel files.
  - Developed tools to parse and visualize over 10 years' worth of Microsoft Excel data.
